Actual product may vary.

PrestiVac dust ignition protected vacuums are designed to safely vacuum explosive, combustible dusts. Our dust ignition protected vacuums are completely grounded and static dissipating because they are built entirely with non-sparking metals and do not have any painted components so there is no risk of fire or explosion from a spark or static build up. All the electrical components, including the motor and starter, are protected by enclosure so there is no source of ignition.

Absolute HEPA^{Plus*} filtration with an efficiency of 99.995% @ 0.2 micron captures all the hazardous dust and ensures the exhaust air is clean, keeping the operator and the environment safe from exposure and contamination.

This unit meets all NFPA codes and requirements for:
Class II Division 2 Groups F & G Hazardous Locations as defined in the National Electric Code (NFPA 70) EPL Dc (Equipment Protection Level)
